

Explanation of statistical data calculation

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION,
MINISTRY OF LABOR, TAIWAN (R.O.C.)

1. Death Compensation Rate of Occupational Injuries per Thousand Workers under Labor Occupational Accident Insurance (LOAI)

Number of persons receiving death compensation for LOAI in the year $\div$ Average number of persons covered by LOAI $\times 1,000\%$

2. Costs of Occupational Injuries

Direct costs (8.89 billion) + Indirect costs 8.89 billion $\times 4$ = 44.45 billion

- Direct costs : Refers to the costs of finance caused by occupational injuries (such as medical expenses and compensation).
- Indirect costs : Refers to the expenses that are typically not covered by insurance (such as accident investigation costs and productive time lost by employees and supervisors helping the accident victim). According to the statistics , indirect costs can be four times higher than direct costs.

3. Fatality Ratios by Injury Types in Severe Occupational Injuries (SOI)

Number of fatalities in SOI by injury types $\div$ Number of fatalities $\times 100\%$

4. Cases Ratios by Causes in SOI

Number of cases by causes in SOI $\div$ Total number of cases $\times 100\%$

5. Disabling Injury Frequency Rate (DIFR)

Number of disabling injuries $\times 1,000,000 \div$ Total manhours worked (8.603 billion hours in 2025), (rounded down to the 2nd decimal places)

6. Disabling Injury Severity Rate (DISR)

Number of injured days off work $\times 1,000,000 \div$ Total manhours worked (8.603 billion hours in 2025), (rounded down to an integer)

Occupational Accident Statistics in 2025

Number of Fatalities in SOI

Number of Fatalities by Industries in SOI

Fatality Ratios by Injury Types in SOI

Cases Ratios by Causes in SOI

Death Compensation Rate of Occupational Injuries per Thousand Workers under LOAI

Number of Occupational Death under LOAI

Payment of Occupational Injuries under LOAI

8.89 Billion NTD

- The death compensation for occupational injury was 996 million.
- The permanent disability benefit was 720 million.
- The occupational injury and disease compensation was 3.36 billion.
- The occupational injury medical benefits was 3.82 billion.

Costs of Occupational Injuries

44.45 Billion NTD

- The direct costs was 8.89 billion.
- The indirect costs was four times higher than direct costs.

Number of Disabilities from Monthly Statistics of Occupational Injuries

Disabling Injury Frequency Rate (DIFR)

Number of Working Days Lost from Monthly Statistics of Occupational Injuries

Disabling Injury Severity Rate (DISR)
