

Occupational injury and disease diagnosis and treatment

Designated hospital for occupational injury and disease diagnosis and treatment

The central competent authority may subsidize medical institutions that provide integrated diagnosis and treatment services and handle the reporting of occupational injuries and diseases.

Services:

- 1 Offer an occupational injury and disease outpatient clinic to provide workers with consultation, assessment, and treatment services for occupational injury and disease.
- 2 Provide medical rehabilitation, occupational rehabilitation, and referral to other departments or social rehabilitation.
- 3 Assist in the assessment of workers injured during occupational accidents for returning to work, and provide advice to both employers and employees for treatment and returning to work.
- 4 On-site visits and assessments for workers to return to work after suspected occupational disease or being in an occupational accident.

Occupational injury and disease diagnosis and treatment

There are currently 19 designated hospital for occupational injury and disease diagnosis and treatment and over 90 hospitals in the diagnosis and treatment network.

Workers who need treatment for occupational injuries or illnesses and assistance with returning to work can access professional and appropriate services at a hospital nearby.

PS : If you think that you have a work-related illness, you can bring your certificate of diagnosis and your work experience to consult with a physician in the occupational medicine department of a designated hospital. If you are diagnosed with an occupational disease, you can apply to the Bureau of Labor Insurance for occupational injury and disease related insurance benefits.
